### Apres Shower Body Dryer – Cleaning Instructions

- The Apres Shower Body Dryer can be cleaned using any good quality detergent
- The cleaning agent can contain chlorine but we would never recommend that any Bleach or products containing Bleach are used as this will age and distress the plastic.
- We do not recommend that any abrasive proprietary cleaner be used because this will damage the surface of the unit.
- Under no circumstances should solvents be employed as a cleaning agent.
- The Apres Shower Body Dryer can be kept looking good following these simple instructions for many years, even today we have units in the community which have been in daily use for the greater part of 20 years.
